Checkpoint 13 Marcio 13-06-2023

Skachkov, Viktor V.A. a few seconds ago
I need to learn a few theory-related things about docker.

Checkpoint 9 Sprint 4 review - Marcio 26-05-2023**Skachkov, Viktor V.A.** 22 days ago

I meet most of the requirements so far, but I need to fix the aggravated functionality to use more SQL statements in the backend.

Checkpoint 8 Marcio 16-05-2023**Skachkov, Viktor V.A.** 22 days ago

I need to add a cart, to add an aggregated functionality, to fix some of the tests and add even more tests to make sure Sonarqube passes.

Checkpoint 4 Sprint 2 Review - Marcio 28-03-2023  

 **Skachkov, Viktor V.A.** 3 months ago
I have fulfilled the requirements for sprint 2. I only need to fix some small things in the Design Document and to make sure the axios methods can accept the token.

Checkpoint 3 Marcio 24-03-2023   

 **Skachkov, Viktor V.A.** 3 months ago
I need to change some things in the research and design documents and separate the layers in the frontend.

Checkpoint 2 sprint1 review 10-03-2023    

 **Skachkov, Viktor V.A.** 3 months ago
I forgot to submit a link to my GIT repository, that's why we will have a meeting next week.

Checkpoint 1 **Marcio** 03-03-2023 

 **Skachkov, Viktor V.A.** 3 months ago
I think I am doing good. I did a lot of the frontend and connected the backend to the database and did a lot of Mochito tests. I have to remove the throw exceptions from the business tests, change the names of some of the variables from "index" to "id" and make sure that there is a check for all optional values which inspects if they are empty or not.

The next thing I am going to do is Authentication and Authorization.
